Valentina Panic

Frontend Engineer | React, TypeScript, Design Systems

410-330-2791 | valentina.panic87@gmail.com | linkedin.com/in/valentinapanic | github.com/ValentinaPanic | valentinapanic.dev | Greenwood Village, CO

Work Experience

Software Engineer, Frontend at *StackHawk, Remote* *Aug 2022 - May 2026*

- Raised weekly page visits from ~10% to ~32% by leading the Daily Active Users initiative: redesigned the Getting Started page into a dashboard ("Things to Do Today," Top 5 Vulnerabilities, Achievements) with the CEO, product, and design
- Built, tested, and shipped customer-facing features in TypeScript and React across Attack Surface Management, API Discovery, GitHub integration flows, and application management for an enterprise B2B SaaS application security platform
- Built 20+ reusable React components with Storybook documentation for the team's design system, including accessible dropdowns and tabs on Headless UI, used by every engineer working on the UI across a ~10-person engineering team; drove adoption through code review and pairing
- Main contributor on migrating every page of the application from Semantic UI and styled-components to Tailwind CSS; moved state management from Redux to Nanostores and contributed to the React 19 upgrade
- Developed integration UIs connecting 6+ third-party tools (Snyk, Jira, Slack, Vanta, Azure DevOps, Bitbucket) for enterprise accounts
- Created a custom D3.js security-metrics visualization shipped to all enterprise customers for vulnerability reporting
- Shipped cross-stack changes beyond the frontend: protobuf / gRPC schema updates and API contract changes alongside backend engineers
- Migrated the frontend service's CI/CD to GitHub Actions, writing its build and test workflow files
- Used Cursor, then Claude Code, for AI-assisted development (planning, coding, debugging, testing, code review, and PRs); authored custom Cursor and Claude rules and reusable prompts that the engineering team adopted
- Took on-call shifts fixing customer-reported production issues; facilitated weekly ops reviews (Sentry, logz.io, Grafana)

Junior Software Engineer, Frontend at *StackHawk, Remote* *Jun 2021 - Aug 2022*

- Shipped UI features in React, TypeScript, and Semantic UI; promoted to Software Engineer, Frontend after 14 months

Front End Intern at *StackHawk, Denver, CO* *Apr 2021 - Jun 2021*

Projects

PrepCode (2026)

Full-stack interview prep app: React/Vite/TypeScript frontend on Vercel, Node.js/Express API on Render, and Supabase (Postgres); streams Claude responses over Server-Sent Events. Live: prep-code.vercel.app | Source: github.com/ValentinaPanic/PrepCode

React, TypeScript, Vite, Node.js, Express, Supabase, PostgreSQL, Anthropic API

Crestline UI · @crestline/ui (2026)

React component library published to npm, with a Storybook showcase, accessibility linting, design tokens, dual ESM/CJS output via tsup, full TypeScript types, and a trusted-publishing GitHub Actions release workflow. npm: npmjs.com/package/@crestline/ui | Storybook: crestline-storybook.vercel.app | Source: github.com/ValentinaPanic/crestline

React, TypeScript, CSS Modules, tsup, Storybook, GitHub Actions

Skills

Frontend: TypeScript, JavaScript, HTML/CSS, React, Tailwind CSS, Headless UI, Redux, Nanostores, D3.js, Storybook, Vite

Backend & APIs: Node.js, Express, Supabase (PostgreSQL), REST APIs, Server-Sent Events, GraphQL, protobuf / gRPC, API contracts

Testing & Quality: Jest, Playwright, code review, accessibility (WCAG), responsive design

CI/CD & Production: GitHub Actions, CI/CD, on-call, Docker, AWS, Sentry, logz.io, Grafana

Tools & Practices: Git/GitHub, Figma, Jira, AI-assisted development, Claude Code, Cursor, Agile/Scrum, component architecture, design systems

Languages: Serbian (fluent), English (fluent), German (basic)

Education

- Full Stack Software Engineer Certification (Ruby, Ruby on Rails, React, Redux) from Flatiron School 2020 - 2021
- Bachelor's Degree in Management (cum laude) from University of Novi Sad, Serbia 2006 - 2012
- Complete Node.js Developer from Zero To Mastery (Udemy) in progress, 2026
